

Kelly M. Hines, Ph.D.

Department of Chemistry
University of Georgia
Athens, GA

Education

Vanderbilt University Nashville, TN
Ph.D. in Chemistry May 2014
Dissertation: Biomolecular Signatures of Disease via Ion Mobility and Mass Spectrometry Techniques
Advisor: John A. McLean, Stevenson Professor of Chemistry

University of Florida Gainesville, FL
Bachelor of Science in Chemistry, *Cum Laude* May 2009

Professional Experience

University of Georgia Athens, GA
Assistant Professor, Department of Chemistry August 1, 2019

University of Washington School of Pharmacy Seattle, WA
Senior Fellow, Department of Medicinal Chemistry 07/2015 – Present

Mayo Clinic Metabolomics Resource Core Rochester, MN
Postdoctoral Fellow, Department of Endocrinology 06/2014 – 06/2015

Research Experience

University of Washington Department of Medicinal Chemistry
Advisor: Professor Libin Xu

- Established calibrants for accurate measurement of lipid collision cross sections by traveling wave ion mobility-mass spectrometry (IM-MS)
- Developed lipidomics methods using hydrophilic interaction chromatography (HILIC) with IM-MS for mammalian and bacterial lipids
- Measured the collision cross sections of 1,400 drugs and drug-like molecules using a novel high-throughput flow injection analysis (FIA)-IM-MS approach
- Characterized the lipidomes of daptomycin-resistant Gram-positive pathogens with HILIC-IM-MS to determine the effects of resistance on individual lipid species

Mayo Clinic Metabolomics Resource Core
Advisor: Dr. K. Sreekumaran Nair, M.D., Ph.D.

- Developed a high-resolution Orbitrap mass spectrometry method for the determination of low-abundance [ring-¹³C₆]-phenylalanine enrichment in individual muscle proteins isolated by 2D-gel electrophoresis.
- Established targeted LC-MS/MS methods for the quantitation of hexosyl ceramides, acyl carnitines, and small molecules in biological matrices including plasma, cerebrospinal fluid, and tissue.
- Evaluated differential mobility spectrometry (DMS)-MS for the separation of glucosyl- and galactosyl ceramides in plasma and cerebrospinal fluid

Vanderbilt University Department of Chemistry
Advisor: Professor John A. McLean

- Investigated the molecular features distinguishing diabetic from non-diabetic wound fluids isolated from a model system of diabetic wound healing using an untargeted ion mobility-mass spectrometry (IM-MS) platform.
- Examined the metabolic profiles of human breast cancer tissues in an untargeted manner using a polar extraction strategy and UPLC-IM-MS/MS.

- Identified six novel sites of phosphorylation in Asef2, a protein involved in cell migration, with 95% sequence coverage and 100% coverage of possible phosphorylation sites.

Honors, Awards and Fellowships

- **05/2019 – Finalist for Postdoc Mentoring Award** from the University of Washington Graduate School and Office of Postdoctoral Affairs.
- **05/2018 – Awarded the ACS Dan Su Travel Award** for the top four female candidates invited to attend the 2018 ACS Postdoc to Faculty Workshop in Boston, MA (Aug. 2018). The award provided \$1,000 to cover travel expenses to attend the workshop.
- **01/2018 – Awarded Young Investigator Travel Grant by The Association for Mass Spectrometry: Applications to the Clinical Lab (MSACL)** for the abstract titled “Lipid signatures as diagnostic predictors of β -lactam “seesaw effect” in glycopeptide, lipopeptide, and lipoglycopeptide resistance.” Award covered travel expenses to attend and present at the 2018 MSACL conference.
- **01/2017 – Awarded Young Investigator Travel Grant by The Association for Mass Spectrometry: Applications to the Clinical Lab (MSACL)** for the abstract titled “Identification of Altered Lipidome in Lipopeptide-Resistant Bacteria by HILIC-IM-MS.” Award covered travel expenses to attend and present at the 2017 MSACL conference.
- **12/2015 – Awarded 2015-16 USP Global Fellowship**
Selected by the U.S. Pharmacopeia as one of three 2015-16 USP Global Fellows for the project titled “Ion Mobility-Mass Spectrometry as an Orthogonal Technique for Identification and Characterization of Drugs by Structure.” Fellowship included \$30,000 to fund the proposed research for one year.
- **09/2014 –** The publication, “Structural mass spectrometry of tissue extracts to distinguish cancerous and non-cancerous breast diseases,” was featured on the November cover of *Molecular BioSystems*.
- **06/2013 –** The wound healing in diabetes work was highlighted in an interview article in The Analytical Scientist “Wound Healing in Diabetes.” The Analytical Scientist has a circulation of 52,000 electronic copies and 21,000 printed copies internationally.

Invited Book Chapters

2. Sarah M. Stow, Nichole M. Lareau, **Kelly M. Hines**, C. Ruth McNees, Cody R. Goodwin, Brian O. Bachmann, and John A. McLean, "Structural separations for natural product characterization by ion mobility-mass spectrometry: Fundamental theory to emerging applications," Invited chapter for inclusion in "Natural Products Analysis: Instrumentation, Methods and Applications," Vladimir Havlicek and Jaroslav Spizek, Eds. *John Wiley & Sons, Inc.* 2013.
1. **Kelly M. Hines**, Jeffrey R. Enders, and John A. McLean, "Multidimensional Separations by Ion Mobility-Mass Spectrometry," Invited chapter for inclusion in "Encyclopedia of Analytical Chemistry (online)," Robert Myers and David Muddiman, Eds. *John Wiley & Sons, Ltd.* December 2012.

Select Presentations

7. **Kelly M. Hines**, Tianwei Shen, Adam Waalkes, Kelsi Penewit, Elizabeth A. Holmes, Stephen J. Salipante, Brian J. Werth, and Libin Xu, *Lipid signatures associated with glycopeptide, lipopeptide, and lipoglycopeptide cross-resistance and the β -lactam "seesaw effect" in MRSA*, 66th American Society for Mass Spectrometry Conference on Mass Spectrometry and Allied Topics, San Diego, CA (June 2018).
6. **Kelly M. Hines**, Adam Waalkes, Kelsi Penewit, Elizabeth A. Holmes, Stephen J. Salipante, Brian J. Werth, Libin Xu, *Alteration of membrane lipids is associated with glycopeptide, lipopeptide and lipoglycopeptide cross-resistance and the β -lactam "seesaw effect" in MRSA*, University of Washington Postdoctoral Association Annual Research Symposium, Seattle, WA (April 2018). **Oral presentation.**
5. **Kelly M. Hines**, Adam Waalkes, Kelsi Penewit, Elizabeth A. Holmes, Stephen J. Salipante, Brian J. Werth, Libin Xu, *Lipid signatures as diagnostic predictors of β -lactam "seesaw effect" in glycopeptide, lipopeptide, and lipoglycopeptide resistance*, Mass Spectrometry: Applications to the Clinical Lab 2018 US Annual Conference & Exhibits, Palm Springs, CA (January 2018). **Oral presentation, Young Investigator Travel Grant**
4. **Kelly M. Hines**, Brian J. Werth, Libin Xu, *Lipidomics Analysis of Antimicrobial-Resistant Bacteria by HILIC-Ion Mobility-Mass Spectrometry*, Federation of Analytical Chemistry and Spectroscopy Societies SciX Conference, Reno, NV (October 2017). **Invited presentation.**
3. **Kelly M. Hines**, Brian J. Werth, Libin Xu, *Monitoring Alterations of Bacterial Lipidome in Antimicrobial Resistance with HILIC-IM-MS*, 65th American Society for Mass Spectrometry Conference on Mass Spectrometry and Allied Topics, Indianapolis, IN (June 2017). **Oral presentation.**

2. **Kelly M. Hines**, Brian J. Werth, Libin Xu, *Identification of Altered Lipidome in Lipopeptide-Resistant Bacteria by HILIC-IM-MS*, Mass Spectrometry: Applications to the Clinical Lab 2017 US Annual Conference & Exhibits, Palm Springs, CA (January 2017). **Oral presentation, Young Investigator Travel Grant**
1. **Kelly M. Hines**, Jody C. May, John A. McLean, Libin Xu, *Evaluation of Collision Cross Section Calibrants for Structural Analysis of Lipids by Traveling Wave IM-MS*, 64th American Society for Mass Spectrometry Conference on Mass Spectrometry and Allied Topics, San Antonio, TX (June 2016).

Teaching Experience

Mentoring – University of Washington, Department of Medicinal Chemistry

- Directed the research of four graduate students: Josi Herron, Dylan H. Ross, Amy Li, and Tianwei Shen
- Instructed graduate students in lipid extraction from biological samples, LC-MS/MS method development and operation, ion mobility-mass spectrometry, and data analysis
- Josi Herron was second author on: Kelly M. Hines, Josi Herron, Libin Xu, “Assessment of altered lipid homeostasis by HILIC-ion mobility-mass spectrometry-based lipidomics,” *Journal of Lipid Research*, 2017, 58, 809-819.
- Dylan H. Ross was second author on: Kelly M. Hines, Dylan H. Ross, Kimberly L. Davidson, Matthew F. Bush, Libin Xu, “Large-Scale Structural Characterization of Drug and Drug-like Compounds by High-Throughput Ion Mobility-Mass Spectrometry,” *Analytical Chemistry*, 2017, 89 (17), 9023-9030.

Teaching Assistant – Vanderbilt University, Department of Chemistry

- Forensic Chemistry Laboratory, January - May 2011, January - May 2012
- Organic Chemistry Laboratory, August 2009 - August 2010, August - December 2011
- Instrumental Analysis Laboratory, August - December 2010.

Assistant TA – University of Florida, Department of Chemistry

- Analytical Chemistry Lab, January - December 2008

Professional Memberships

- **2018 – Present** Member, American Society for Microbiology
- **2012 – Present** Member, American Chemical Society
- **2010 – Present** Member, American Society for Mass Spectrometry

Professional Service

- **2018 – Present** *Ad hoc* reviewer for journals including *Journal of the American Society for Mass Spectrometry* and *Analytical Chemistry Acta*.
- **01/2018** – Chair of “Microbiology Metabolomics” session at Mass Spectrometry: Applications to the Clinical Lab (MSACL) 2018 Conference
- **2016 – Present** *Ad hoc* reviewer for Mayo Clinic Metabolomics Resource Core Pilot and Feasibility Program grants
